DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/28/2005 has been entered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. **Claims 1 and 4-9 are** rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,810,272 (hereinafter '272). Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and '272 claims the same subject matter. The common subject matter is a method entering information into a wireless device via a text editor. The said information are individually selected via a two step process:

- (1) Depressing a key of the said device representing an information group.
- (2) Scroll/Navigating through and information with a navigation/scrolling key.

Regarding **claim 1** and dependent **claim 4**, the claims have similar and/or exact limitations as the **claims 1-34** (e.g., 1-2) (see '272).

Regarding **claim 5** and dependent **claim 6**, the claims have similar and/or exact limitations as the **claims 1-34** (e.g., 1-2) (see '272).

Art Unit: 2686

Regarding **claim 7** and dependent **claims 8 and 9**, the claims have similar and /or exact limitations as the **claims 1-34** (e.g., 1-2) (see '272).
